

Team RaccoonBytes

Progress Report Week 7

Overall

1. Development - more features implemented
2. CI / CD Pipeline - Updates, Getting in touch with Codacy, Code Climate

Developer Updates

- We have got the following functions implemented:
- Task list:
 - Adding and removing tasks
 - Moving tasks around using a drag and drop system
- Timer:
 - The timer functionality is fully implemented
 - The timer is styled as a ring, and works well
 - The timer also shows up in the title of the tab, making it easy to track no matter what you are working on

CI/CD Pipeline Updates

- We got into contact with Codacy and Code Climate, and are holding a poll to decide which one to use
- We merged the pipeline code into the main branch
 - All the developers have set up tools for their use, such as linting
- We altered the workflow for documentation to trigger on a merge to main

To-do

- Integrate the various pages of the website
- Add functionality for editing tasks
- Implement the progress bar for tasks and the overall pomodoro counter
- Begin integrating Codacy or Code Climate into our workflow
